Appliances you can rely on

Good kitchen appliances should fit with the people who use them, and we all have different needs, tastes and budgets. At IKEA, we work closely with our suppliers to share our knowledge about life at home, and they share their expertise with us. Together we create appliances to rely on at prices that fit every size of wallet. To make the selection easier for you.

5 Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a 5-year guarantee (except TILLREDA and LAGAN, 2 year).

Plug in and cook!

TILLREDA appliances are easy to use and very easy to place, with a plug-in/plug-out feature that makes them especially suitable for small-sized kitchens.

The induction hob heats up fast and is highly energy-efficient – plus it's easy to stow away or hang on the wall to free up counter space for other activities.

The handy microwave oven is easy to place just about anywhere. There's no handle – just push to open. A perfect option when there is no space for a built-in microwave.

And a small fridge for a small-sized kitchen. Also handy in the den, basement, guest house, dorm room or wherever you may want quick access to a beverage or snack.

TILLREDA portable induction hob, white.

Ovens

Whatever cooking (or kitchen) style you have, we have an oven for you! Offering a wide range of functions – everything from basic warming to steam cooking, making every cooking experience easier and more fun – they are also developed to fit perfectly in your IKEA kitchen. Simply choose the functions that suit the way you cook, and we will meet you with a matching look.

When choosing an oven, consider the following:

01

How often do you use your oven, and for what kind of food? We have everything from very simple, easy-to-use ovens to more advanced with lots of different functions.

02

How much food do you cook at the same time? Our ovens come in sizes from 56 to 77 litres.

03

What style do you prefer? No matter if your kitchen goes in a more modern or classic style, we have ovens that will match perfectly.

5

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a 5-year guarantee (except TILLREDA and LAGAN).

Tips

Did you know that telescopic rails make cooking a lot simpler, and safer? To load and unload food without getting burned is a piece of cake as you get a better grip on the ovenware – when using oven gloves, that is. And it'll be a snap to pull out the food to check the temperature, stir or adding too.

Are you aware that you can clean the oven and keep it as new with close to zero effort from your part? With the self-cleaning pyrolytic function you heat up the oven to burn all grease and food residue to ashes. All you have to do is wipe it out afterwards.

Types

Conventional ovens

Ideal for you who wants an easy to use oven, including top and bottom heat and all the basic functions you need for cooking and baking.

Forced air ovens

Ideal for you who loves to cook. A fan spread the heat fast and evenly, letting you cook different dishes at the same time without mixing flavours.

Overview

Conventional ovens

GÖRLIG
Usable volume: 56 litres
804.132.28 **\$450**

Forced air ovens

MATÄLSKARE
Usable volume: 71 litres
205.082.53 **\$650**

SMAKSAK
Usable volume: 72 litres
304.132.40 **\$950**

ANRÄTTA
Usable volume: 71 litres
705.082.36 **\$800**

Key features

Spacious inner dimensions with up to 5 cooking levels ensure you have plenty of room for your food. Choose between ovens with volumes ranging from 55 to 72 litres.

Telescopic rails let you load and unload food without getting burned as you get a better grip on the ovenware. Pull your food out to fast and steady check the temperature, stir or lubricate.

Get the roast just right every time using the integrated **meat thermometer** with temperature sensor.

A built-in modern-looking **clock** is ideal for keeping an eye on the time while you're cooking.

Anti-finger print finish makes it easy to keep the stainless-steel surface sparkling clean day in and day out.

Child-safety
Our oven doors have a child-safety lock to make it safe for kids to be in the kitchen and take part in all the activities.

Main cooking functions

The **top and bottom heating** is ideal for cooking dishes with a crispy finish and for slow cooking of casseroles.

With the **steam** function you combine steam and hot air to get optimal humidity and heat levels, keeping food soft and moist on the inside, and crisp and brown on the outside.

The **fan forced air convection** spreads the heat quickly and evenly, allowing you to cook or bake several dishes simultaneously without flavours spreading between them.

With the **grill** function that distributes heat evenly over your food, you get that tasty, finger-licking surface on meat and vegetables, as well as a nice golden-brown colour on your gratins.

The **bread/pizza baking** function gives your food a more intense brown outside and a mouth-watering crispy bottom.

The special **pastry** function can help you to get the perfect moist topping on your baked cookies and pies.

The **warming program** enables you to keep food warm without becoming overcooked or burnt.

The fast **quick pre heat** function warms up the oven quickly.

Thaw your food seven times faster using the **quick defrost** function.

W59.5×D55×H59.5 cm.

Microwave ovens

Microwave ovens aren't what they used to be. In fact, they've become much better – a wide range of functions lets you grill, bake, steam and crisp, apart from defrosting and reheating. What's more, the combination of forced air and microwaves in our microwave combi ovens reduces both cooking time and energy consumption. Being a microwave oven and regular oven in one, it's a practical choice for smaller kitchens, or if you cook a lot of food and need an extra oven.

When choosing a microwave oven, consider the following:

01

How often do you use your micro, and for what kind of food? We have everything from very simple, easy-to-use micros to more advanced microwaves/microwave combi ovens with lots of different functions.

02

How much food do you cook at the same time? With a microwave combi oven you can have all in one or get an extra oven when the big family comes to visit.

03

What style do you prefer? No matter if your kitchen goes in a more modern or classic fashion, we have micros that will match perfectly.

5

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a 5-year guarantee (except TILLREDA and LAGAN).

Sustainability

Oven cooking doesn't have to take ages, or use lots of energy. With our microwave combi ovens, you get a forced air oven and a microwave oven all in one. It means faster baking, grilling and roasting, as well

as quick defrosting and warming. Less time waiting around and more time enjoying great home cooking with the people you love.

Tips

Did you know that cooking time is significantly shortened if you combine the micro function with forced air in a microwave combi oven, compared to an ordinary oven? The combination allows you to get a perfect result every time, while saving both time and energy.

Are you aware that placing a built-in microwave in a high or wall cabinet, is a smart use of space – but also a way to create an ergonomic and smooth workflow that's just right for you.

Types

Microwave ovens

Ideal for you who fast and easily want to heat up or thaw food and beverages. Some of our models also include a crisp function allowing you to cook food.

Microwave combi ovens

This is a microwave oven and forced air oven in one, ideal for you who hunger for versatility but don't want two conventional ovens. You can use it as a microwave oven for quick warming or defrosting and as an oven for grilling, baking and roasting. Even better, you can combine both to save time and energy – without compromising the taste.

Overview

Microwave ovens

TILLREDA
Usable volume: 20 litres
804.933.62 **\$85**

VARMD
Usable volume: 20 litres
905.082.83 **\$390**

905.082.64 **\$1,050**

Microwave combi ovens

SMAKSAK
Usable volume: 43 litres
004.169.47 **\$1,150**

Key features

A built-in modern-looking **clock** is ideal for keeping an eye on the time while you're cooking. Use the timer when you want total control over the cooking time.

An easy to use and keep clean **touch control** adds a modern touch to any kitchen.

Anti-finger print finish makes it easy to keep the stainless-steel surface sparkling clean day in and day out.

Our oven doors have a **child-safety lock** to make it safe for kids to be in the kitchen and take part in all the activities.

Microwave functions

The **crisp** function allows you to bake pizza, pie and other dishes faster than in an ordinary oven. The function is also great for frying food such as eggs, bacon, sausages and hamburgers.

With the **grill** function that distributes heat evenly over your food, you get that tasty, finger-licking surface on meat and vegetables, or a nice golden-brown colour on your gratins.

In a hurry? Use the **quick start** to heat up your food and beverages in a jiffy.

Thaw your deep-frozen food faster. The **defrost** function is ideal for meat and poultry, fish, vegetables and bread.

Oven functions

The **top and bottom heating** is ideal for cooking dishes with a crispy finish and for slow cooking of casseroles.

The **fan forced air convection** spreads the heat quickly and evenly, allowing you to cook or bake several dishes at once without flavours spreading between them.

The **bread/pizza baking** function gives your food a more intense brown outside and a crispy bottom.

The **special pastry** function can help you to get the perfect moist topping on your baked cookies and pies.

The **warming program** enables you to keep food warm without becoming overcooked or burnt.

With **pre-set cooking programs** you can choose the proper setting for different dishes and recipes – and get the same yummy result every time.

Hobs

A cook's best friend, the kitchen hob is central to everyday cooking. Our energy-saving induction hobs deliver fast and precise cooking results, are very easy to use and include all the functions you may need. Each has its own unique features and a variety of sizes – choose between one to several flexible zones – to perfectly suit your kitchen and your cooking style.

When choosing a hob, consider the following:

01

How often do you use your hob? We have everything from mobile one-zone hobs to high-end gas and induction hobs.

02

How much food do you cook at the same time? You can choose to have a small hob with 1 or 2 zones to extra wide hobs for large pots and pans.

03

What type of chef are you? If you're the one who wants total control choose an induction or gas hob. You can also choose hobs with flexible zones, which adapts to the shape of the pot or pan.

5

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a free 5-year guarantee (except TILLREDA and LAGAN).

Whats's that noise?

When your induction hob makes noises, it is perfectly normal. You may hear a low humming sound, whistling or ticking. It is all part of the induction technology and simply means your hob is doing its job. If you are curious, have a look in the user manual and get acquainted with the different types of noises and why they occur.

Sustainability

Save time and energy while you cook! Like to cook but don't always have enough time? Induction hobs heat up your pots and pans in a super efficient way. That means faster cooking and more time to sit and enjoy great home cooked meals with family or friends. Because induction hobs only heat your cookware, they use less electricity and they're safer.

Types

Induction hobs

Induction hobs are up to 50% faster and 40% more energy efficient. With just one touch you can select features and regulate the heat in an instant.

MATMÄSSIG
59 cm
104.672.67 **\$950**

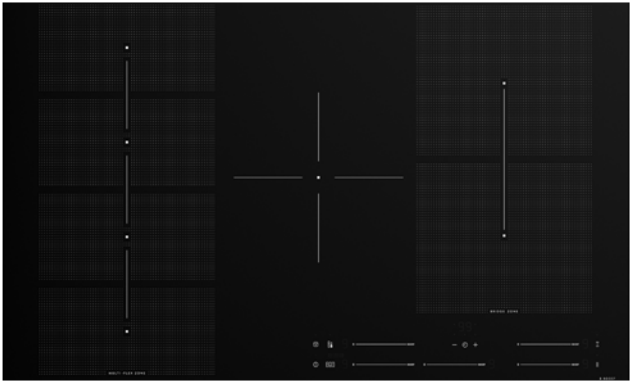

VILSTA
59 cm
405.577.23 **\$690**

Key features

A **portable** hob is perfect for smaller kitchens or wherever you need an extra cooking zone. It's easy to move around and can be stowed away when not in use to free up counter space for other activities. Just plug it in wherever you need it.

Depending on your needs and how much food you cook at the same time, choose a hob with **enough cooking zones**. We have hobs with 1, 2, 3, 4 and 5 zones. Also think about the width of the hob: the bigger the hob is, the more space you'll have for pots and pans.

Functions

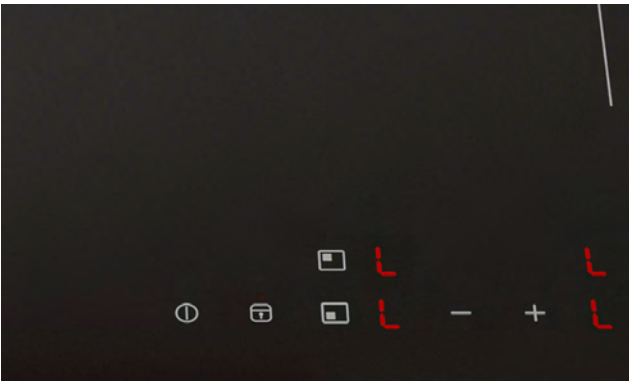

The **power booster** delivers additional power to a single cooking zone, perfect for boiling water. The booster can be set with just one touch.

Vary the cooking surface by using the **flexible heating zones**. You can use them together or separately, and adapt them to pots and pans in different shapes and sizes.

When you press the **pause** function, all activated zones are paused – and when you press the pause button again, the zones will come back to the same temperature as before. That way you can suspend the cooking process if you're interrupted, and re-start again in an instant.

When you press and hold the **child lock** button, you can't start the hob or change the temperature. To unlock the hob, press the child lock button again for 4 seconds. This is also a good function to use when you're cleaning the hob surface and don't want to switch on any zones.

Get excellent control when you cook with the **individual timers** allowing you to time each zone separately. Ideal for boiling eggs, rice or pasta.

The **touch and press control panel** allows you to regulate the heat easily and precisely by just touching the + and – symbols.

Extractor hoods

An extractor hood helps keep your kitchen air clean and free from smells, steam and grease. Our models now come with different air caption capacities, which means they have all been optimised to only extract the air that needs to leave the house, while keeping warm or cool air inside. And since an extractor hood is also an important visual element in any kitchen, we have a wide range of wall-mounted, built-in, or ceiling-mounted models to suit different room settings and needs.

When choosing an extractor hood, consider the following:

01

How wide is your hob? The width of the hood should be as wide or wider.

02

What does your kitchen look like? If you have an open plan in your home, make sure to choose a hood with low noise level.

03

Valve or charcoal filter? Find out if you can connect the extractor hood to a valve that leads the air out of the building. If not, you need to connect the extractor hood to a charcoal filter, which takes away the grease and odour from the air and lets it out in to the room again.

5

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a 5-year guarantee (except TILLREDA and LAGAN).

Sound levels

Sound levels for appliances are measured in decibels (dBs). Our extractor hoods have been tested in speed 3 to determine the dB level.

The sound level of your extractor hood is affected by:

- **Type of installation.** Exhaust-mode or recirculation-mode.
- **Length and diameter of the exhaust pipe between extractor and exhaust vent.** The longer it is and the smaller the diameter, the louder it gets.
- **90° bends.** The more bends you have in the exhaust pipe, the greater the sound.

Decibel levels are listed in the product information so you can compare and choose the hood that's suitable for your needs and comfort.

Tip/awareness

Every 6 dB-increase in sound will double the perceived sound level. In other words, 66 dBs is perceived as twice as loud as 60 dBs; and 72 dBs is perceived as 4 times louder than 60 dBs.

Types

Built-in extractor hood

If you want a completely uniform and streamlined kitchen, choose a built-in extractor hood with a front that match the rest of your kitchen.

Wall-mounted extractor hoods

Our wall-mounted extractor hoods come in many shapes, styles and sizes. Choose a unique piece or one that match the rest of your appliances and the kitchen. Just make sure it has the same size or is wider than your hob for optimal performance.

Tips

Did you know that turning on the extractor hood 5 minutes before you start cooking will make it work more efficiently? Turning it on will circulate the air and allow the extractor hood to more effectively catch cooking odour and draw it directly into the fan. It is also a good idea to let the extractor hood run for 10 to 15 minutes after cooking allowing it to absorb residual particles in the room.

60 cm

Key features

All our extractor hoods have energy efficient **LED lighting**. This type of lighting normally lasts as long as the extractor hood does, and it illuminates the entire hob to make cooking easier.

When you cook a lot of food and the smoke is thick in your kitchen, the **booster** function will come to your rescue. It has a higher speed than max speed and can be turned on for maximum 6 minutes to dissolve heavy cooking fumes.

Build-in extractor hoods

UTDRAG

Built-in extractor hood

\$250

Stainless steel. 605.089.82

Prefer a hidden hood? UTDRAG built-in extractor hood with LED lighting is mounted almost invisibly in a wall cabinet. You start it and adjust the extraction area by pulling out the hood's lower part.

Key features

- ☒ LED lighting
- ☐ Booster function
- ☐ Dimmable lighting
- ☐ Touch control

Technical information

Extraction rate in exhaust mode: 340 m³/h.
Noise level at max. exhaust speed: 67 dB (A).
Extraction rate in re-circulation mode: 140 m³/h.
Noise level at max. re-circulation speed: 72 dB (A).

Installation

For ducted installation: Please use NYTTIG TUB 150.
For recirculation installation: Please use charcoal filter NYTTIG FIL 120.
For this installation also NYTTIG TUB 150 is required.

Measurements

Width: 59.9 cm.
Depth: 38.7-64.4 cm.
Height: 21.5 cm.
Cord length: 1.0 m.
Motor power: 110W.

UNDERVERK

Built-in extractor hood

\$480

Stainless steel. 805.089.62

A powerful hood hidden in the cabinet – you just choose a door you like to get a uniform look in the kitchen. A LED lighting strip gives even work lighting – making cooking more comfortable.

Key features

- ☒ LED lighting
- ☐ Booster function
- ☐ Dimmable lighting
- ☐ Touch control

Technical information

Extraction rate in exhaust mode: 630 m³/h.
Noise level at max. exhaust speed: 64 dB (A).
Extraction rate in re-circulation mode: 365 m³/h.
Noise level at max. re-circulation speed: 79 dB (A).

Installation

For ducted installation: Please use NYTTIG TUB 150.
For recirculation installation: Please use charcoal filter NYTTIG FIL 500.
For this installation also NYTTIG TUB 150 is required.

Measurements

Width: 59.9 cm.
Depth: 35.8 cm.
Height: 24.5 cm.
Cord length: 1.0 m.
Motor power: 250W.

Fridges and freezers

Yes, an IKEA fridge or freezer keeps your food fresh for longer, but they do so much more to help make your life a little nicer. There are plenty of features for storing and enjoying your food in the best way possible—like, a chill mode for glass bottles, fan cooling for consistent temperatures, electronic displays for settings and functions, and fast freezing (just to name a few).

When choosing fridges and freezers, consider the following:

01

How much food do you normally store in your fridge and/or freezer. How many are you in the family? How often do you shop? We have different sizes and capacities to choose between.

02

Do you need any specific function or accessories to simplify storing and organising your fridge/freezer? We can offer interiors for every need.

03

What style do you prefer and what works in your kitchen? Choose between freestanding appliances creating a design statement in your kitchen, or integrated adding to a streamlined and uniform look.

5

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a 5-year guarantee (except TILLREDA and LAGAN).

Sustainability

Did you know that approximately a third of all food produced in the world is not eaten? That's like dumping every third bag of groceries straight into the bin! IKEA fridges and freezers are full of smart ideas to help you keep food fresh and tasty longer. By reducing food waste, you are saving money and time spent shopping.

Tips

Did you know that you can keep your food fresh for longer with an in-built fan? The fan circulates the cool air and keeps the temperature consistent throughout the whole fridge. And as the temperature is the same everywhere, you can store your food and beverage exactly where you want it.

Did you know that defrosting and scraping ice is nothing but a bad memory? The no frost function automatically regulates the humidity levels and prevents ice and frost from spreading.

Types

Freestanding

Should you prefer your fridge/freezer to be a unique piece in your kitchen, choose **freestanding** options. Plus, they hold more than integrated fridges/freezers without taking up more kitchen space. Visit store for the range offer in your market.

Integrated

If you want a uniform expression, **integrate** your fridge/freezers behind the same fronts as the rest of your kitchen.

Overview

Freestanding fridges and freezers

TILLREDA
Usable volume:
43 litres
604.970.21 **\$155**

LAGAN
Usable volume:
97/16 litres
905.089.90 **\$299**

SUPERKALL
Usable volume:
182/59 litres
705.090.14 **\$1,750**

Key features

A built-in **cooling fan** spreads the air and maintains a consistent temperature throughout, allowing you to make use of the entire space and store all types of food and beverages anywhere.

The **touch control panel** makes it easy to select the right functions and temperature settings, whether you are cooling dessert, freezing fresh vegetables or going on vacation.

You'll never ever have to defrost or scrap ice again! The **no frost** function automatically regulates the humidity levels to prevent frost and ice to spread on food or in the fridge.

Integrated **LED light** technology illuminates every corner. The light source is maintenance-free, lasts the lifetime of the appliance and makes it easier for you to see what food and drinks you have.

Functions

Vacation mode allows you to keep the empty fridge closed while you're away without a bad odour forming.

The **fast cooling** mode allows you to quickly cool down fresh food and beverage, perfect after major groceries shopping.

With **fast freeze** you can quickly reduce the temperature to lock in the freshness and nutrients of food, even in large amounts.

With **bottle chill mode**, an alarm sounds at the end of the cool down time. Perfect if you want to chill glass bottles in the freezer or to cool food.

If the door of the appliance is not properly closed the **door alarm** will make a sound to remind you to close it.

The **temperature alarm** warns you if there is a sudden temperature increase caused by a malfunction.

Interior accessories

Don't forget all the yummys in the back of the fridge! This shelf pulls out and revolves, so you can see and reach the smallest jars hiding in the back. A clever addition to your fridge or cabinet.

SNURRAD storage turntable, transparent.
505.213.90 **\$39.90**

Freestanding fridges

TILLREDA

Fridge
\$155
White. 604.970.21

A small fridge for a small-sized kitchen. Also handy in the den, basement, guest house, dorm room or wherever you may want quick access to a beverage or snack.

Functions

- ✓ Led light

Accessories

Noise level: 41 dB (A).
Connection cable included.

Volume/litres: 43.

Measurements

W47.2×D45×H49.2 cm.

LAGAN

Fridge with
freezer compartment
\$299
White. 905.089.90

This freestanding fridge with freezer compartment has all the basic functions you need. The small size is ideal for small-sized kitchens. The adjustable shelves allow you to adapt the space inside.

Functions

- ✓ Led light

Accessories

- 1 adjustable shelf.
- 1 crisper.
- 1 ice scraper.

Technical information

Energy consumption: 259 kWh/year
Noise level: 39 dB (A).
Connection cable included.

Volume/litres: 97/16.

Measurements

W55.3×D57.4×H83.8 cm.

SUPERKALL

Fridge with
freezer compartment
\$1,750
White. 705.090.14

A spacious fridge/freezer combo with auto defrost and smart storage solutions to keep food fresh longer. For a uniform look, fit it inside a cabinet and add doors that match the rest of your kitchen.

Functions

- ✓ Led light

Accessories

- 4 adjustable shelf.
- 1 crisper.
- 3 freezer drawers.

Technical information

Energy consumption: 358 kWh/year
Noise level: 39 dB (A).
Connection cable included.

Volume/litres: 812/59.

Measurements

W54.0×D55.0×H179.0 cm.

Dishwashers

Our integrated dishwashers are designed to be fitted with your choice of door for a seamless match with the rest of your kitchen. The tall interiors provide generous space for dishes and there are several clever features like the delayed-start function that allows you to run the dishwasher when you want to take advantage of off-peak utility rates. There's also an AutoOpen function that automatically opens the door at the end of the cycle to improve drying performance.

When choosing a dishwasher, consider the following:

01

How much space do you have and how many people live in the household? Our range includes dishwashers in different sizes and volumes.

02

What specific functions are important to you? Perhaps 3 storage levels to increase the load capacity? This way you can get more dishes out of the way and enjoy a clean kitchen.

Sustainability

Sit down, relax and save water! Let the dishwasher do the job while you can unwind after dinner or do something else you love. A dishwasher uses less water and energy than washing dishes by hand. Simply put, you'll save both time and water while making your life at home more sustainable, too.

5

Whatever your choice, you can be sure your appliance is made to last. Our entire range comes with a 5-year guarantee (except TILLREDA and LAGAN).

Tips

Did you know that all our dishwashers are integrated? You can fit them with the same front as the rest of your kitchen to create a uniform look throughout.

Did you know that by running the Machine Care programme regularly, you remove limescale, grease and food remnants that that can cause odour or malfunction.

Sound levels

Sound levels for appliances are measured in decibels (dBs). As the operating programme influences the dB level, all our dishwashers are tested according to standard while operating the ECO programme. The dB levels are listed in the product information so you can compare and choose the dishwasher that's suitable for your needs and comfort.

Tip/awareness

Every 6 dB-increase in sound will double the perceived sound level. In other words, 66 dBs is perceived as twice as loud as 60 dBs; and 72 dBs is perceived as 4 times louder than 60 dBs.

Key features

With our **water efficient** dishwashers, lots of dishes will be sparkling clean with just a small amount of water.

All our dishwashers are **fully integrated** to match the rest of your kitchen.

Our dishwashers have **different sizes** for different needs and kitchens. They're 45 cm or 60 cm wide, and you can choose between models with 2 or 3 levels – 3 levels hold more.

With **adjustable baskets** you can make room for plates and glasses of different sizes.

Soft plastic spikes and clever holders keep glassware in place and reduce the risk of breakages. While cutlery baskets that let you stand utensils up mean better cleaning and easier sorting and putting away.

Towards the end of the program, the **auto open** function automatically opens the door so that the dishes dry as quickly as possible.

The **delayed start** function allows you to run the dishwasher when you want. Our machines have delay options from 3 up to 24 hours.

Led lighting in the dishwasher provides a nice and convenient light when you put in and take out the dishes.

Programs

- AUTO**
For all types of load – crockery, cutlery and pots and pans.
- ECO WASH**
A more sustainable, water-saving option. For normally dirty crockery and cutlery.
- RAPID WASH**
Perfect if you're in a hurry or have a lot of dishes. For recently used crockery and cutlery.
- NORMAL WASH**
Great for normally dirty crockery and cutlery.
- SILENT WASH**
Extra quiet – ideal for open plan homes or when your dishwasher is close to where you eat. For normally dirty crockery and cutlery.
- PRE WASH**
This is a pre wash for very dirty crockery.
- MACHINE CARE**
This program performs dishwasher maintenance by cleaning the interior of the dishwasher using hot water.

Services

Our broad service offer gives you the freedom to design your own price tag by choosing not only the products that suits your budget but also deciding how much you want to do yourself and how much you want us to do for you.

Below you'll find all the services you need to plan and by your entire kitchen – and how much each of them costs. For more details about our services, talk to a co-worker at IKEA stores or visit us at [IKEA.sg](#)

Delivery

Whether you're shopping in store or online, and no matter how big the purchase, we'll do the heavy lifting and bring it to your home or business.

The IKEA home planner

Design the METOD kitchen of your dreams in a 3D environment and get a price on every detail as well as the total kitchen. Print out your drawings and product list at home, or save to the IKEA website. At the IKEA store you can discuss your design and get lots of advice and guidance from our kitchen experts.

Learn more at [IKEA.sg](#)

Planning and consultation

Even on big projects, the little things matter. Discuss your ideas with our team of design professionals and we'll help nail them down in detail.

Guarantee appliances

Appliances have a 5-year guarantee.

How long is the guarantee valid?

This guarantee is valid for five (5) years from the original date of purchase of the IKEA appliance from IKEA. LAGAN and TILLREDA appliances have a two (2) year guarantee, valid from the original date of purchase. The original sales receipt is required as proof of purchase. If service work is carried out under guarantee, this will not extend the guarantee period for the appliance, or for the new parts.

What is covered under this guarantee?

The guarantee covers faults of the appliance, which have been caused by faulty construction or material faults from the date of purchase from IKEA. This guarantee applies to domestic use only. The exceptions are specified under the headline "What is not covered under this guarantee?"

Which appliances are covered under this guarantee?

The free five-year (5) guarantee is valid for all domestic IKEA kitchen appliances and covers defects in materials and workmanship.

Which appliances are not covered under this guarantee?

All appliances purchased from IKEA before 1st of August 2007. For appliances named LAGAN and TILLREDA, a guarantee is valid for two years from the date of purchase.

What will IKEA do to correct the problem?

The designated service company will examine the product and decide, at its sole discretion, if it is covered under this guarantee. If considered covered, the designated service company through its own service operations, will then, at its sole discretion, either repair the defective product or replace it with the same or a comparable product. Within the guarantee period, the costs to remedy the fault e.g. repairs, parts, labour and travel will be covered, provided that the appliance is accessible for repair without special expenditure. If the product is installed in a not standard built-in solution the customer has to make the product accessible before the service visit.

Who will execute the service?

The designated service company will provide the service through its own service operations or authorized service partner network.

What is not covered under this guarantee?

• Deliberate or negligent damage, damage caused by failure to observe operating instructions, incorrect installation or by connection to the wrong voltage, damage caused by chemical or electro-chemical reaction, rust, corrosion or water damage including but not limited to damage caused by excessive lime in the water supply, damage caused by abnormal environmental conditions. • Consumable parts including batteries and lamps. • Non-functional and decorative parts which do not affect normal use of the appliance, including any scratches and possible colour differences. • Accidental damage caused by foreign objects or substances and cleaning or unblocking of filters, drainage systems or soap drawers. • Damage to the following parts: ceramic glass, accessories, crockery and cutlery baskets, feed and drainage pipes, seals, lamps and lamp covers, screens, knobs, casings and parts of casings. Unless such damages can be proved to be due to production faults. • Cases where no fault could be found during a technician's visit. • Repairs not carried out by our appointed service providers and/or an authorised service contractual partner or where non-original parts have been used. • Repairs caused by installation which is faulty or not according to specification. • The use of the appliance in a non-domestic environment i.e. professional use. • Transportation damages. If a customer transports the product to their home or other address, IKEA is not liable for any damage that may occur during transport. However, in case of IKEA delivery of the product to the customer's delivery address, then eventual damages to the product that occurs during this delivery will be covered by IKEA, (but not under this guarantee). For claims under this last particular condition the customer should contact IKEA Customer Relation at [IKEA.sg](#) • Cost for carrying out the initial installation of the IKEA appliance.

How to reach us for before buying if you need advice: If you have any questions about our appliances, please contact IKEA stores or at [IKEA.sg](#)

How to reach us if you need service support after buying: Please ring the number given in the documentation that comes with the product. To make sure that we can give you the best assistance, please read the Instructions for Use carefully before contacting us. Please also have the IKEA article number for your appliance at hand before calling us. You'll find this 8 digit number on your receipt as well as on the rating plate of the appliance.
